DETAILED ACTION

Claim Objections

1. Claims 45, 62, 73 objected to because of the following informalities: Applicants need to have more structure or apparatus related language in Claims 45, 62, and 73 since said claims are apparatus claims. Applicants need to have more structure than just base units, response units, and transceivers for the sending and receiving of polling signals and response signals. An example would be a controller/controller means or processor/processor means in addition to said base units, response units, and transceivers for the generation of said polling and response signals. All claims that depend directly or indirectly from the above independent claims are objected to for the same reasons set forth above. Appropriate correction is required.
